

# The milk you choose matters

**We're all looking for ways we can reduce our environmental impact and when it comes to your favourite cup of coffee, the milk you choose matters. When you think about it, milk makes up 80% of your coffee beverage.**

## Environmental impact of one glass (200mL) of different milks

On 23 February 2021, the United Nations Security Council announced that Climate Change is the 'Biggest Threat Modern Humans Have Ever Faced'.

Source: Poore & Nemecek (2018), Science. Additional calculations, J.Poore. Graphic excludes rice milk.

## How you can help!

The best decision a café can make on sustainability is to **buy Australian made**. When you choose to buy local, you know you are doing your part in helping the environment by reducing your carbon miles.

- Promote plant-based milk consumption
- Encourage BYO cups
- Recycle your empty containers
- Upcycle milk containers as coffee trays
- Compost food & coffee waste (it's great for gardens)

# Why MILKLAB?

**MILKLAB is always looking for ways to minimise the impact on our planet. Some of which include:**

## Australian Owned

MILKLAB is 100% owned & made in Australia. We always try to source locally before looking offshore to minimise our carbon miles as much as possible.

## Ethical Sourcing

For our dairy milk options, MILKLAB ethically source and partner with dairy farms that are committed to humane treatment of cows.

## Renewable Energy

We've installed 10,000 solar panels to our Shepparton manufacturing site, which contributes to over 20% of the site's power usage. This is the largest roof installation in Victoria, and one of the largest in Australia.

## Did you know?

### MILKLAB Almond

While water usage on almonds appears high versus other milks, our suppliers use tightly managed, sustainable water sources to nurture almond trees – which have a positive impact on CO<sub>2</sub>. Our almond growers are careful to maintain good bee health.

Almond flowers are an important source of nutrition for honey bees helping them to increase hive health and to make better honey. No pesticides are used on our almond farms; and any rarely used chemicals are not applied when bees are present.

### MILKLAB Oat

Made with 100% Australian grown oats.

### MILKLAB Macadamia

Made with 100% Australian grown macadamias.

All MILKLAB packaging uses responsibly sourced FSC grade board and carries the Australian Recycling Label.
